

Community Details

Name of the community: Mulearn

What is this community?

Mulearn operates as a community within GTech, a consortium comprising over 200 IT company CEOs in Kerala. Its primary objective is to facilitate a seamless connection between academia and the industry. The Academia and Technology Focus Group (ATFG) framework was created and maintained to assist students in becoming industry ready. µLearn, associated with this ATFG framework, is a synergic philosophy of education with a culture of mutual learning through micro peer groups. This ecosystem, harbouring a network of participants such as universities, online communities, nodal agencies and the industry, integrates its participants and their contributions into a holistic system, providing mutual benefits to all. This inclusive community is open to all college students, regardless of their academic degree, and membership is free of charge. For more information, visit mulearn.org.

The community leverages the Discord platform to organize and conduct its events. Additionally, Mulearn offers a variety of courses covering tech topics such as web development, app development, and more. To further support students in their learning journey, the community connects them with mentors from the industry, providing valuable guidance to those facing challenges. MuLearn is a synergic philosophy of education, with a culture of mutual learning through micro peer groups. We are here to assist you in breaking through the echo chambers and free you from the shackles you have grounded yourself in. The main concept of learning is through micro peer groups called 'Learning circles'. You can create a learning circle at mulearn.org. Join any learning circle and start learning and see the power of the small learning circles. This concept is mainly to not lose motivation when learning to code, or new skills. Because learning new skill is a hectic process, by combining your friends to it will make it more ease.

There are interested groups for each domains like web, app etc. Interest groups or IG's contains some learning circles and they will learn about specific domain.
